

Assignment 13 - Use github.com

All of the code to do this is in the lecture .pdf and in the class notes.

The code to change is near line 647 in pick_word.py

Change:

```
def guessLetter ( self, letter ) :  
    return False
```

To look like this. The function is near line 647

```
def guessLetter ( self, letter ) :  
    if letter not in self.letters_picked:  
        self.letters_picked = self.letters_picked + letter  
    if letter in self.word:  
        self.n_success += 1  
    else:  
        self.n_incorrect_letters += 1  
    if self.n_incorrect_letters > 8:  
        return True  
    return False
```
